Reproducibility in a few words

what does reproducibility means for you

↻ **Cyril**

Hard to do!

👍 2 🗨 0

↻ **Melanie**

take a lot of effort, but is worth it

👍 0 🗨 0

↻

Structuring of information (data, scripts, and so on) so it is easier for other people to apply your methods and 'reproduce' your findings

Nigel

In terms of digital research, it should describe all the steps that are needed to transform input data to the results, this ideally should be a formal description (ideally code with an environment that it should run in, as well as a schema for the data that is expected)

👍 0 🗨 0

↻

Júlia

The fact that a third party is able run the same data with the same tools (codes, software versions) and obtain the same results
